PURDUE UNIVERSITY | Office of the Vice Provost for Graduate Students and Postdoctoral Scholars

Program Details

Second Choice

Campus	Purdue Northwest (PNW)
Major	Applied Artificial Intelligence
Degree Objective	MS in Applied Artificial Intelligence
Area of Interest	
Course Delivery	Residential
Term/Year	Spring 2025
Location of Study	

First Choice

Campus	Purdue Fort Wayne (PFW)
Major	Computer Science
Degree Objective	Master of Science (MS)
Area of Interest	
Course Delivery	Residential
Term/Year	Spring 2025
Location of Study	

Campus

Biographical Information

Biographical	
First Name	Lekhana
Last Name	Sandra
Preferred Name	Lekhana
Sex	Female
Birthdate	07/25/2000
Native Language	Telugu
Contact	
Email	sandralekhana@gmail.com
Phone	+91 63038 57689
Mobile	+91 63038 57689
Mailing Address	C P Apartments, N V R Layout, R No.16 Madanapalle, Andhra Pradesh 517325 India
Permanent Address	C P Apartments, N V R Layout, R No.16 Madanapalle, Andhra Pradesh 517325 India
Citizenship	
Citizenship Status	Foreign National
Primary Citizenship	India

Veteran/Service Member Information

If you were previously a member of the U.S. Armed Forces, did you receive an honorable discharge?

No

Military Affiliation Information

Required Question: At the time of enrollment, do you expect to hold an active affiliation or position with a non-US military organization or security/intelligence agency?

No

Citizenship Status	International
What is your native language?	Telugu

Copy

PURDUE UNIVERSITY | Office of the Vice Provost for Graduate Students and Postdoctoral Scholars

Emergency Contact

Form Title	Emergency Contact
Relationship	Parent/Guardian
First Name	Parvathi
Last Name	S
Email Address	parvathi.malepati@gmail.com
Street/P.O. Box/Apartment	CP Apartments NVR layout
Street Line 2	Road No 16
City	Madanapalle
Country	India

Campus and Program

Form Title	Campus and Program
Purdue University Status	
Are you currently a registered graduate student at one of the Purdue University campuses? (This does not include the Purdue University Global campuses.)	No
Select your current status as it pertains to Purdue University (this does not include the Purdue University Global campuses).	New to Purdue
Did you ever apply to or attend a Purdue University campus under a different surname? If yes, please indicate the surname below.	No
Are you currently a Purdue employee (including a graduate staff member) on any Purdue campus? If yes, indicate your PUID in the field above.	No
I consent and authorize Purdue University faculty and/or staff to access my Purdue University academic record for University business (Applicants that don't consent must still upload Purdue transcripts).	No
First Choice Campus and Program	
Select a Campus	Purdue Fort Wayne (PFW)
Select your Proposed graduate Major	Computer Science
Are you interested in applying to a second campus and/or graduate major?	Yes

Copy

PURDUE UNIVERSITY | Office of the Vice Provost for Graduate Students and Postdoctoral Scholars

Computer and Information Technology

Form Title	Computer and Information Technology Questionnaire
List up to two additional Areas of Interest you might like to pursue in the CIT program.	Data Applications
	Project Management & Business Analysis

Copy

PURDUE UNIVERSITY | Office of the Vice Provost for Graduate Students and Postdoctoral Scholars

Academic History

Undergraduate #1	
Institution	Madanapalle Institute of Technology & Science (0000)
Dates of Attendance	06/2018 - 06/2022
Location	Madanapalle, India
Degree	Bachelor of Technology: 06/2022
Major	Computer science and Engineering
Awards	3.0 AND ABOVE CUMULATIVE

Copy

PURDUE UNIVERSITY | Office of the Vice Provost for Graduate Students and Postdoctoral Scholars

Additional Information

Form Title	Additional Information
First Name	Adolfo

Additional Information (continued)

level of education completed by a parent, guardian, or caregiver?	
Recruitment Programs (Application Fee Waiver Eligibility)	
Have you participated in a Purdue Fort Wayne information session or recruitment event?	No
Certifications	
Do you hold a teaching or other certification?	No
Certification Type	Generative AI certification
Area of certification	GAN architecture,Progressive Growing GANs, StyleGANs and Training Applications- LLM
Publications	
List publications	Published a paper in International Journal on Application in Information and Communication Engineering on "Credit card Fraud detection Using Data Science and Machine Learning Techniques" In this manuscript, we proposed a framework for detecting fraud in credit card transactions. With increasing digitalization, the risk of misuse and financial loss grew, necessitating robust detection methods. We employed data science and machine learning to model historical transaction datasets, focusing on fraudulent instances. The trained model identified fraudulent new transactions through data assessment and preprocessing to establish algorithm parameters and performance metrics.
Purdue University Non-Credit Courses	
Have you previously completed a non-credit course or program with Purdue University that is a pathway to credit?	No

Employment

Job #1	
Organization Name	Capgemini
Dates of Employment	12/2022 - Present
Ending Position	Senior Analyst
Description	As an Analyst, I conducted in-depth data analysis to identify key trends that supported strategic decision-making across the organization, significantly enhancing our competitive edge. I developed, maintained interactive dashboards using Power BI, enabling stakeholders to visualize complex datasets and derive insights in real time. To forecast trends and business strategies, I employed advanced statistical techniques and predictive modeling, which resulted in a 20% increase in forecast accuracy.
Location	BANGALORE, Karnataka, India
Direct/Indirect Reports	1
Hours	10
Employment Type	Full-time
Pre/Post Baccalaureate	Post-Baccalaureate

Statement of Purpose

In a world where technology shapes our lives and dreams, I found my passion weaving through the lines of code and the complexity of data. My Holistic Academic Journey of Computer Science began in Madanapalle, India, where a simple spark of curiosity ignited a fascination with the endless possibilities that technology offers. This fascination led me to pursue a Bachelor of Technology in Computer Science and Engineering at Madanapalle Institute of Technology and Science, where I graduated in June 2022.

From an early age, I was captivated by the intricate dance between mathematics and computer science. The way algorithms could solve complex problems felt like magic to me. This sense of wonder deepened as I engaged with various subjects in my undergraduate studies, from software engineering to artificial intelligence. I was especially drawn to projects that challenged me to think critically and creatively. My mother's voice often echoed in my mind, reminding me to ask not, "How busy are you?" but "What are you busy at?" This guiding question became my compass, steering me toward meaningful pursuits and impactful projects.

One of my most significant accomplishments during my undergraduate studies was the development of a Credit Card Fraud Detection System. This project was more than just an academic assignment; it was a mission that resonated deeply with my values. I utilized advanced data mining techniques to identify and prevent fraudulent transactions, employing statistical models to analyze transaction patterns and detect anomalies. Witnessing the tangible impact of my work reinforced my belief in technology's potential to drive change and improve lives. It taught me the importance of vigilance and innovation in a digital world increasingly fraught with risks.

Now, as I stand on the cusp of my next adventure, I often hear people say that work is needed everywhere, we must decide whether to work hard or work smart. For me, finding a path that resonates with my values is far more important than merely working hard; it's a way to solve half the problem. Currently, I serve as a Senior Analyst on a finance project at Capgemini Technology Services. This role has immersed me in the realm of data analysis, where I strive to uncover insights that can guide strategic decision-making. Crafting interactive dashboards using Power BI, I transform complex datasets into engaging stories that not only reveal patterns but also foster understanding and clarity among stakeholders.

In my role, I have had the opportunity to apply advanced statistical techniques and predictive modeling. These experiences have deepened my understanding of how data shapes financial strategies and operational efficiencies. I take pride in my ability to communicate intricate data insights in a way that is accessible and actionable. This ability has proven essential in a fast-paced business environment, where data-driven decisions can significantly impact outcomes.

Amidst my professional journey, I discovered a growing passion for the intersection of machine learning and computer security. The potential for algorithms to enhance cybersecurity and protect sensitive information captivated my interest. I recognize that in our digital age, data breaches and privacy violations are ever-present threats. My commitment to harnessing technology for the greater good drives me to explore innovative solutions that address these challenges.

Additionally, I have taken joy in data visualization, seeking ways to present intricate information that illuminates insights and guides others through our data-rich landscape. I believe that effective communication is as crucial as technical proficiency. A well-crafted visualization can tell a story, making complex data accessible to a wider audience and fostering informed decision-making.

Throughout my academic journey, I engaged in several exciting projects that reinforced my skills and broadened my horizons. One notable project involved developing an Object Detection system using state-of-the-art machine learning techniques. Employing frameworks like Keras and YOLO, I achieved high precision in identifying objects within images and video frames. This project showcased the remarkable capabilities of technology to address complex challenges and further fueled my desire to explore new horizons in the field.

As I look toward the future, I am drawn to the graduate program at Purdue University Fort Wayne. The curriculum resonates deeply with my interests and career aspirations, covering essential areas such as software engineering, computer security, and artificial intelligence. The collaborative and innovative environment at Purdue feels like a nurturing garden for ideas, a place where creativity flourishes. I am particularly excited about the opportunity to work with Dr. Jonathan Rusert, whose research focuses on subfields of Natural Language Processing (NLP), including developing new adversarial attacks, attack detection algorithms, and defenses against these attacks. I share a keen interest in addressing bias in NLP systems and the privacy violations posed by AI and websites, making Dr. Rusert's work particularly compelling to me.

The chance to collaborate on projects that resonate with my passions fills me with anticipation and hope. I envision myself contributing to research that not only advances our understanding of NLP but also creates practical applications that enhance the ethical use of technology. I am eager to delve into the complexities of language processing and explore how we can mitigate biases in AI systems, ensuring that technology serves everyone fairly and equitably.

Pursuing a graduate degree in computer science at Purdue University Fort Wayne is not merely a step toward my career goals; it is an invitation to embark on a journey of exploration and innovation. With every line of code I write and every challenge I face, I seek to weave a narrative that transforms dreams into reality. I aspire to illuminate the path ahead, crafting solutions that resonate with innovation and purpose while leaving a lasting impact on the world.

In conclusion, pursuing a graduate degree in computer science at Purdue University Fort Wayne is not just a path to personal growth, but a canvas for my aspirations. Here, I envision myself delving into the depths of knowledge, exploring the intricacies of technology, and crafting solutions that resonate with purpose. I am eager to illuminate the shadows of complexity with innovative ideas and to collaborate with like-minded peers who share my passion for making a difference. As I step into this next chapter, I am ready to embrace the challenges and opportunities that await, driven by the belief that through dedication and creativity, I can transform my dreams into reality.

Personal History Statement

"What do you believe is the true impact of technology on society?" my professor asked during a recent discussion about our aspirations in the field. I thought for a moment and replied, "I believe technology can be transformative, but it really depends on how we choose to use it. It has the power to bring people together or push them apart. I want to focus on harnessing that power for good, ensuring that everyone has access to its benefits." This belief has shaped my academic journey and inspired my pursuit of knowledge, driving me to become a persistent and resourceful individual prepared to embrace the challenges of graduate school.

From an early age, I found myself captivated by the world around me, always curious and eager to learn. My Mother, a dedicated Professor, often reminded me, "In every challenge lies an opportunity." This philosophy helped me navigate my early struggles, teaching me that difficulties are not barriers but pathways to growth. I remember a particularly tough semester in high school when math seemed insurmountable. Instead of giving in to frustration, I embraced the challenge, reaching out to teachers and classmates for help. This experience showed me that collaboration could turn obstacles into opportunities for learning.

As I faced these challenges, I was reminded of a lesson from Albert Einstein: "It's not that I'm so smart; it's just that I stay with problems longer." It has captured my approach during a critical project in college. I took on a data analysis assignment that initially felt overwhelming. As I delved deeper, spending long hours wrestling with complex algorithms, I chose to immerse myself in research and seek guidance from professors. Not only did I complete the project successfully, but I also discovered a passion for problem-solving that continues to fuel my academic pursuits.

During this journey, I encountered a question that resonated deeply: "What if everything you are going through is preparing you for what you have asked?" This thought became especially poignant when I struggled to balance academic and personal commitments. One evening, feeling overwhelmed, I sat on my bed and contemplated my path. In that moment of vulnerability, I realized that each challenge was shaping my resilience and determination. The late nights studying, the group projects that didn't go as planned, and the moments of self-doubt were all building blocks for the future I envisioned. This reflection fortified my belief that every experience contributes to our growth, preparing us for the next chapter of our lives.

Engaging in community service has also broadened my perspective. I volunteered at local schools, introducing underprivileged children to the wonders of technology. One memorable day, a young girl looked at me with wide eyes as I showed her how to code a simple game. Her excitement was infectious and made me realize the profound impact that technology can have on lives. In those

moments, I learned that everyone, regardless of their background, brings something unique to the table, and it is our collective experiences that enrich our community.
Transitioning to university life, I embraced a spirit of inclusivity and collaboration. Working on group projects with peers from diverse backgrounds was transformative. I vividly recall one project where we developed a mobile app, with each team member contributing their unique skills and perspectives. This collaboration led to creative solutions that none of us could have achieved alone, reinforcing my belief that diverse teams foster innovation and a sense of belonging.

Reflecting on this, I realized that “Change is the only constant in one's life.” This became evident during my involvement in various projects. As technologies evolved, I had to adapt quickly, learning new programming languages and frameworks. I remember a project where we had to pivot mid-course due to emerging technologies. Instead of viewing this change as a setback, my team and I embraced it, using our diverse strengths to innovate and adapt. This experience taught me that flexibility and a willingness to embrace change are crucial in the ever-evolving field of technology.

Mentoring young students has brought me immense joy and fulfillment. I’ve participated in initiatives aimed at encouraging girls to explore Technology that adds to their lives. One afternoon, I shared my journey with a group of eager students, and their faces lit up as I recounted my challenges and successes. It fueled my desire to create an environment where everyone feels empowered to contribute, nurturing creativity and advancing knowledge.

As I reflect on my journey, I am reminded of the truth in the words of an Anonymous Writer: “What lies behind us and what lies before us are tiny matters compared to what lies within us.” I carry with me the lessons learned from every challenge faced and every success celebrated. With a deep commitment to using technology as a force for good, I am excited to continue exploring how I can leverage my skills to address pressing societal issues. My journey is just beginning, and I am eager to embrace the possibilities that await, fueled by the belief that my efforts can contribute to a more equitable and connected world.

SANDRA LEKHANA

lekhana.sandra@gmail.com|| +91 – 6303857689 || LinkedIn || Andhra Pradesh, India

EDUCATION

B. Tech in Computer Science and Engineering **June 2022**
Madanapalle Institute of Technology and Science, Madanapalle, Annamayya Dist., Andhra Pradesh, India

Intermediate [Mathematics Physics Chemistry] **April 2018**
Bharathi Junior College, Madanapalle, Annamayya Dist., Andhra Pradesh., India

SSC (Grade -10) **June 2016**
Ravindhra Bharathi English Medium School, Madanapalle, Annamayya Dist., Andhra Pradesh, India

EXPERIENCE

Capgemini Technology Services, India **December 2022 - Present**
Analyst

- Conducted comprehensive data analysis to identify key trends and supported strategic decision-making.
- Developed and maintained interactive dashboards using Power BI to visualize complex data sets.
- Applied advanced statistical techniques and predictive modeling to forecast trends and inform business strategies.
- Designed and executed complex SQL queries for data extraction and manipulation from relational databases.
- Implemented machine learning algorithms to automate data analysis tasks and enhance security.
- Ensured compliance with data governance policies and practices, maintaining data security and privacy.
- Provided actionable recommendations based on data insights to support marketing, finance, and operations teams.

ACADEMIC PROJECTS

Credit Card Fraud Detection using Data Mining Techniques **Jan - May 2022**

- Developed a robust Credit Card Fraud Detection System utilizing advanced data mining techniques to identify and prevent fraudulent transactions. Employed statistical models to analyze transaction patterns and detect anomalies with high accuracy , to enhance security and reduce financial losses.
- **Technology Used:** Python, TensorFlow , Pandas, NumPy, SQL

Object Detection Using Machine Learning **Sep - Nov 2021**

- Implemented an Object Detection project utilizing state-of-the-art Machine Learning techniques to accurately identify and localize objects within images or video frames. Leveraged deep learning frameworks like pre-trained models to achieve high precision and efficiency in various applications.
- **Technology Used:** Python, Keras, YOLO, OpenCV, NumPy, Pandas, Docker

CERTIFICATIONS

- Python & C programming from IIT Bombay **2021**
- Docker, AWS and Azure Certifications from Udemy **2023**

EXTRA-CURRICULAR ACTIVITIES

- Attended an Ethical Hacking Workshop organized in college
- Member of Ethical Hacking club and Coordinated events organized in the college
- Coordinator for National level technical symposium event organized in college
- Volunteered as a coordinator for a fresher's day event organized in our college

SKILLS

Programming languages: Java, C, Python , C++ and R
Web technologies: HTML, CSS, Java script
Framework: TensorFlow, Apache Spark**,** Faster R-CNN,YOLO
Database: MySQL, MongoDB
Web Based Services: Node.js, Apache, JSON
Design Tools: Adobe, Figma
Operating Systems: Mac OS, Docker, Windows server

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY ANANTAPUR

ANANTHAPURAMU - 515 002, ANDHRA PRADESH, INDIA

CC 160635

योगः कर्मसु कौशलम्

College Name: MITS-(Autonomous)-MADANAPALLE-Code:69

Sandra Lekhana

D/o. SR Chakravarthi

&

M Parvathi

*having fulfilled the academic requirements and passed the examination held during June, 2022 in *** First Class With Distinction ****

has this day been admitted by the Executive Council to the Degree of

Bachelor of Technology

(COMPUTER SCIENCE & ENGINEERING)

Mode of Study is Regular
Medium of Instruction: English

Given under the Seal of the University

Saturday, 1 June, 2024

योगः कर्मसु कौशलम्

Provisional Certificate

S.No.: 0006474

Registered No. : 18699A0552

Aadhaar No. : 906318227471

This is to certify that Ms. SANDRA LEKHANA

daughter of Sri. S R CHAKRAVARTHI

Smt. M PARVATHI

passed the ***BACHELOR OF TECHNOLOGY (B.Tech.)*** degree examination

in ***COMPUTER SCIENCE & ENGINEERING***

held in the month of JUNE 2022

and secured ***FIRST CLASS WITH DISTINCTION***.

She has satisfied all the requirements for the award of B.Tech. degree of Jawaharlal Nehru Technological University Anantapur, Ananthapuramu, Andhra Pradesh, India .
